

## **Global Liquidity Partners Selects Catalys to power Algo Execution & Routing Services**

**FOR IMMEDIATE RELEASE: Chicago, Wednesday 26 August 2015** — CameronTec Group, the global standard in financial messaging infrastructure and tools for the Capital Markets industry, today announced Red Bank, NJ based trading technology firm Global Liquidity Partners has selected the Catalys FIX gateway to power its proprietary algorithmic execution and routing services to customers.

Global Liquidity Partners provides electronic execution services driven by a highly efficient proprietary architecture. Its trading platform is built on a low latency solution that eliminates the speed advantage of HFT gamers and combines speed with a state-of-the-art decision engine designed to source liquidity while minimizing information leakage.

“Global Liquidity Partners believes the new frontier is adaptive algorithms,” says Tim Lang, CEO of Global Liquidity Partners. “At Global, we are consistently working on adaptive algorithms to provide our clients with the latest in this technology. To this end, we have selected CameronTec’s Catalys FIX gateway to provide our customers with the world’s most superior FIX-enabler.”

Peter Mott, Vice President Americas for CameronTec Group says: “Trading firms such as Global Liquidity Partners are constantly under pressure to invest and leverage proven technologies to provide clients with state-of-the-art decision trading engines. CameronTec is pleased to be working with Global to help them realize their vision for a superior technology solution.”

At the core of CameronTec technology is a unique understanding of the FIX world that comes from a concentration of the world’s largest FIX deployments. With a host of industry-firsts, Catalys and CameronFIX provide unprecedented levels of flexibility and innovation that firms need to sustainably differentiate in today’s markets.

-Ends-

## **About CameronTec Group**

CameronTec Group is the global standard in financial messaging infrastructure and tools for the Capital Markets industry that today powers the largest user base among financial institutions. Uniquely positioned as a software and service provider for enterprise, hosted and managed platforms, our dedicated professional services team ensures optimal integration and deployment performance. CameronTec's flagship offering Catalys is underpinned by market-leading connectivity technology and engineered on the widely acknowledged standard in FIX engines, CameronFIX. Catalys Market Access offers FIX-powered gateways to more than 60 equity, derivative and FX markets across the globe, as a locally deployed or managed / hosted service. Complementary FIX integration, testing and management solutions that include VeriFIX, FIX Conductor and FIX Technician CTS, build out a complete offering to provide end-to-end global connectivity solutions for any electronic trading environment, using or migrating to FIX and proprietary protocols. CameronTec's solutions are tested and trusted by the world's best firms in over 50 countries, on all five continents, representing the broadest cross section of tier 1 and 2 investment banks, brokers, fund managers, exchanges, regulators, and members of the ISV community. Our offering is exceptionally supported by regionally focused teams in London, Stockholm, Chicago, New York, Hong Kong, Sydney, Paris, Frankfurt and Mumbai.
